# SAAS SPEND OPTIMIZATION MADE EASY

**Leverage your existing OneLogin directory infrastructure with Cleanshelf to automatically identify unused, underused, or unmanaged SaaS licenses and subscriptions.**

**SPEND VISIBILITY & ACCOUNTABILITY**

**OVERSIGHT & LICENSE OPTIMIZATION**

**DEPARTMENT SAAS UTILIZATION**

**SOC 2 SECURITY & COMPLIANCE**

## Save up to 30% on your SaaS spend using Cleanshelf for OneLogin integration!

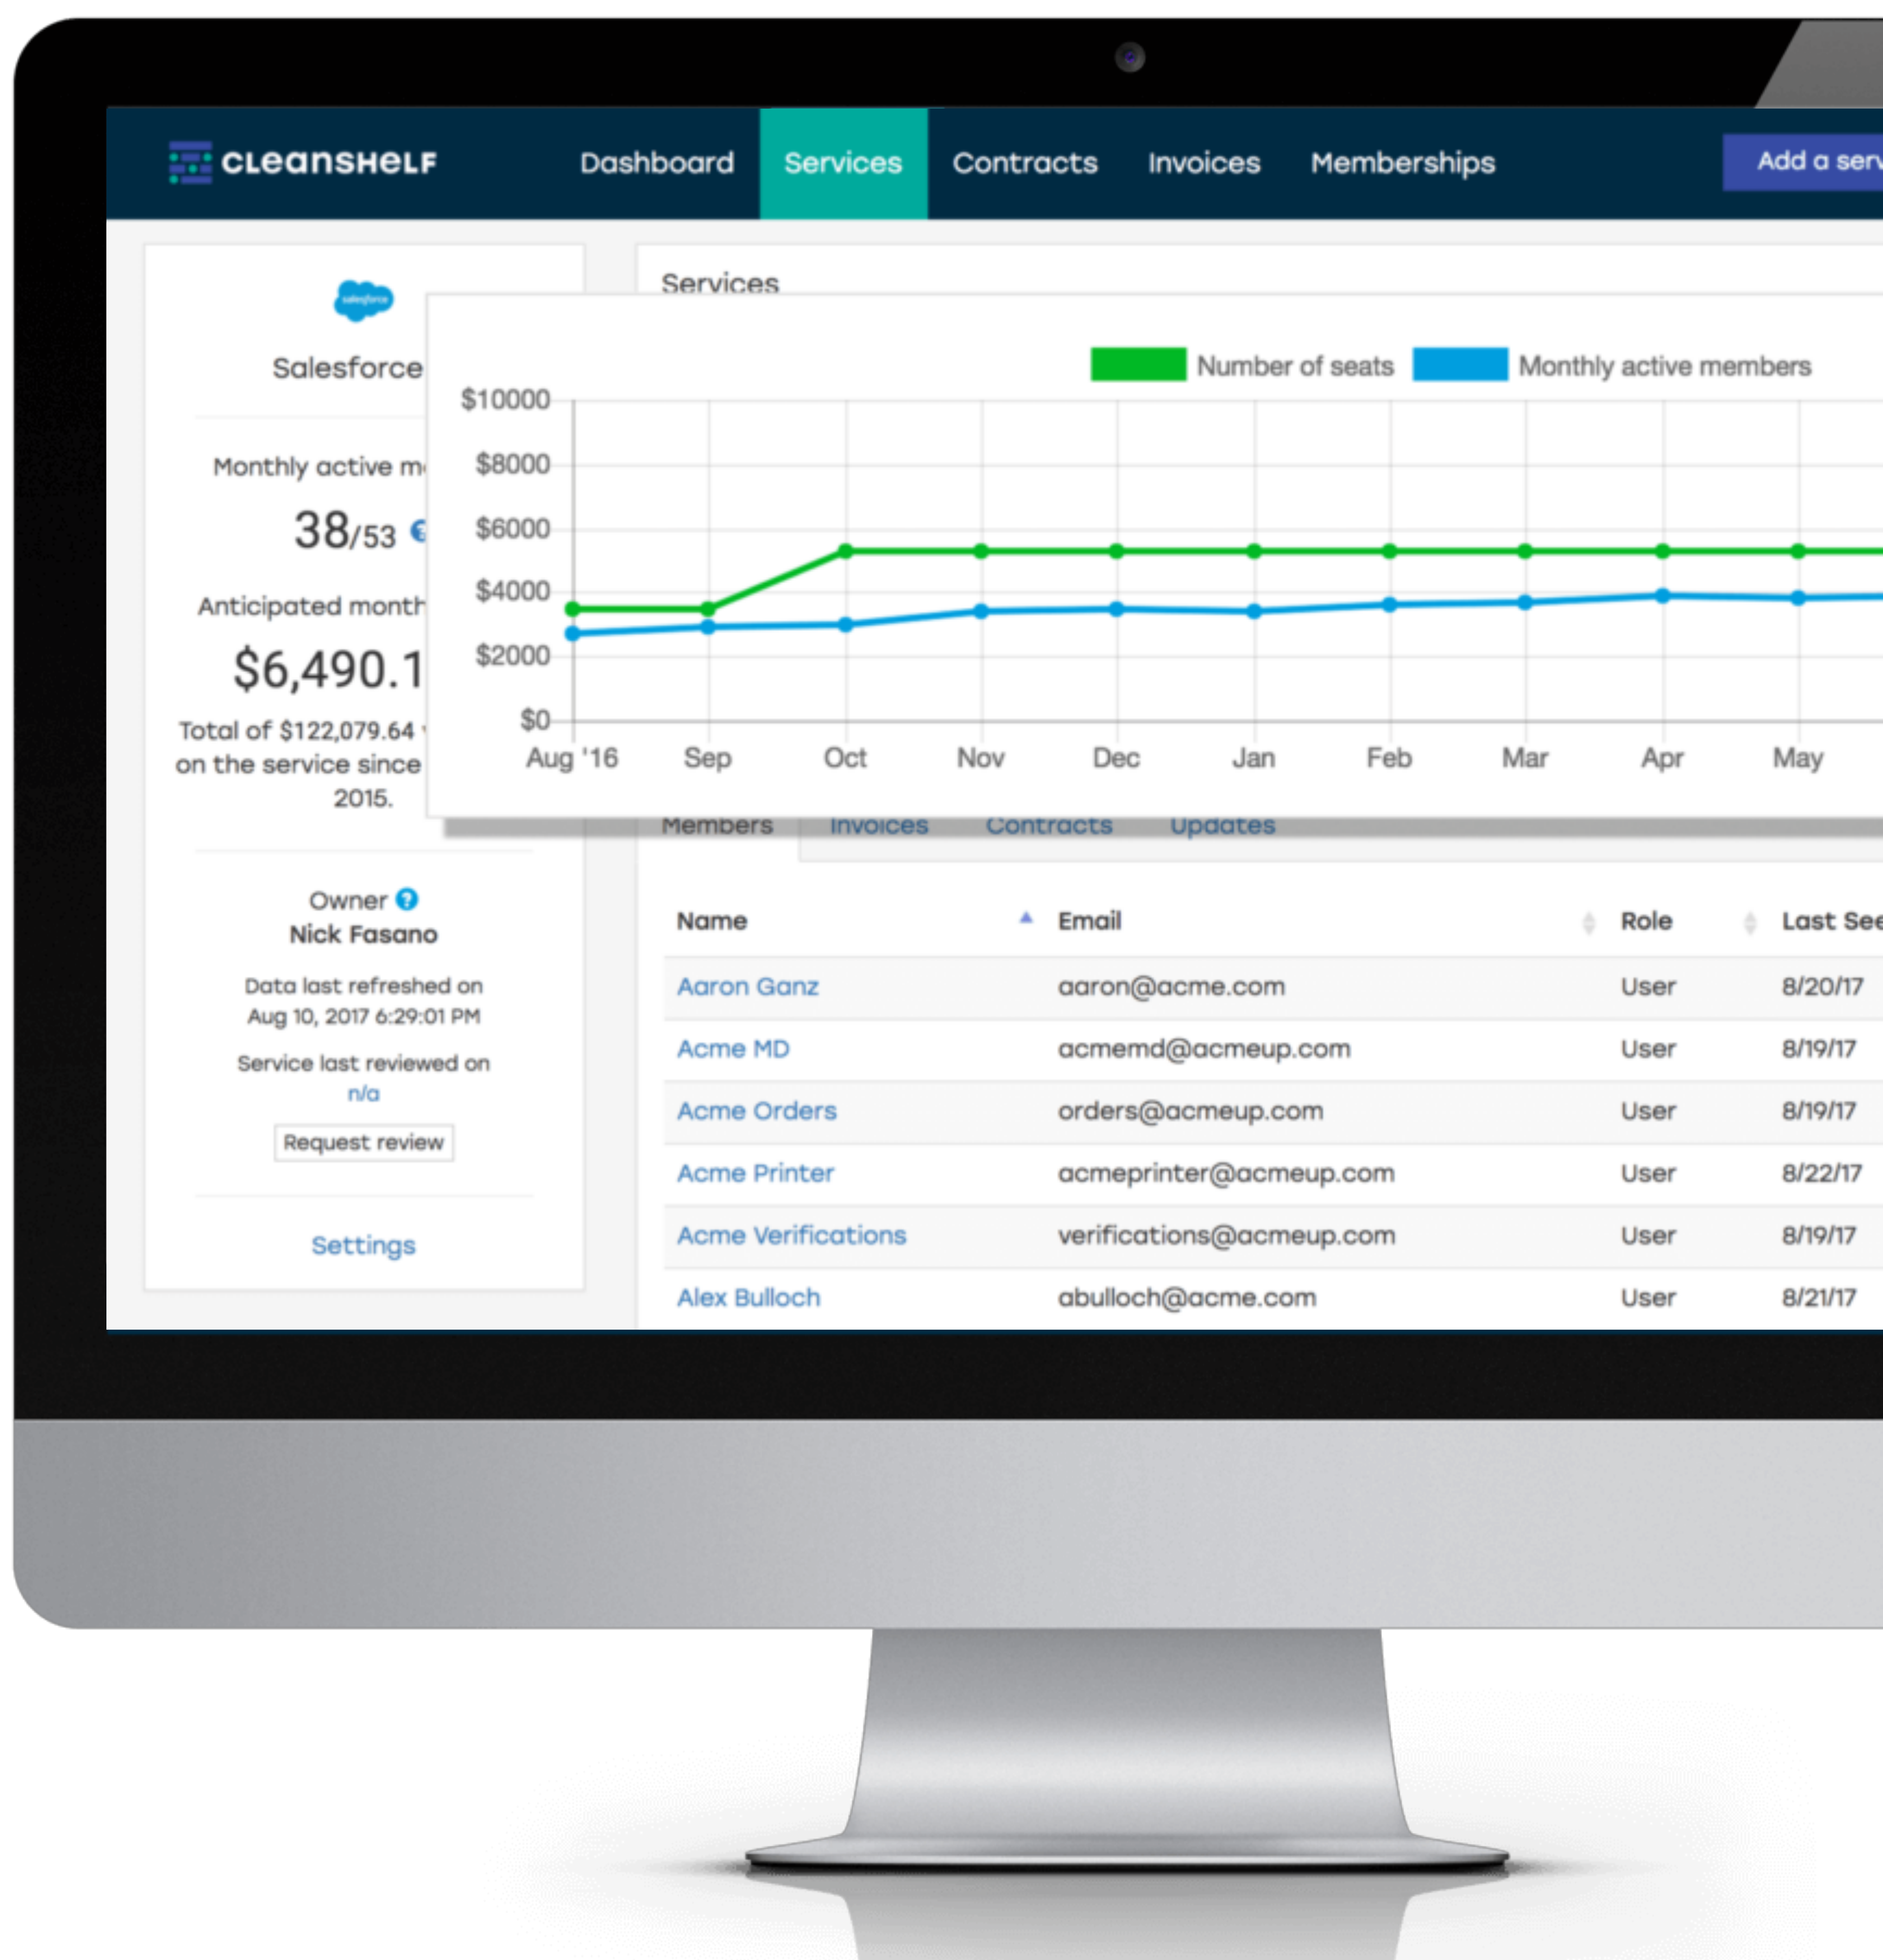

Focused on excellent user experience, the integration joins the best from both solutions. OneLogin’s “single-sign-on” service integrates seamlessly to Cleanshelf’s state-of-the-art platform. This enables all cloud-first companies with immediate access to start managing their SaaS subscriptions for all OneLogin connected cloud apps within Cleanshelf - with minimal effort.

### Cleanshelf’s most valuable features

- SaaS apps usage insights
- Identification of wasteful SaaS spend
- Detailed overview by departments
- Advanced reporting dashboard
- Actionable insights for contract renewals

### How it works?

Cleanshelf tracks monthly active members by parsing OneLogin access logs, the most accurate and up-to-date information about software usage for leading enterprise apps - such as Salesforce, Box, AWS, Office 365, Jira and Slack.

## Are your SaaS apps driving ROI? Knowledge (of usage) is power!

You most likely have dozens or hundreds of SaaS tools deployed in your organization. This is impossible to track and manage accurately. Are your apps adopted by your staff? Are your licenses underused? Is the spend *fully* justified? **A client case** where IT led the rollout of a popular file sharing and collaboration software Box highlights that **usage insights drive ROI**. Initially, the adoption of Box was high with nearly 90% of employees using the tool. Usage quickly dropped and hovered around 65%. But by using **data from Cleanshelf pulled directly through OneLogin**, IT was able to detect the root of the problem and introduce better education; helping employees better experience the benefits and see the challenges the new tool resolved. Knowledge of usage is power - and is essential to realize ROI of a software project.

## Benefit from OneLogin's and Cleanshelf's leading technologies

From instant visibility and accountability for every SaaS dollar, immediate oversight along with license optimization opportunities and ability to meter the department SaaS utilization, to guaranteed top notch security with SOC 2 compliance, the partnership uncovers significant benefits for organizations.

### 1 Track app usage and save funds

Track actual usage with Cleanshelf and identify saving opportunities for you. Benefit from utilization rate metering and automated spend optimization.

### 2 Gain Instant Visibility

Make the usage of implemented SaaS tools within your organization visible and eliminate redundant apps. Track spend & utilization across departments.

### 3 Get smart recommendations

Gain monthly summary reports and actionable insights. Get an upper hand for contract renewals with automated information about your licenses and subscriptions.

### 4 Never worry about security

It's Cleanshelf's first priority! A SOC 2 Type 2 compliant SaaS vendor, it utilizes SSL encryption and world-class secure server infrastructure to keep your data private and secure.

## The result?

Cleanshelf's tight integration with OneLogin enables coupling of spend and usage information to let finance, procurement, and IT departments maximize ROI on cloud software subscriptions. **The integration drives new levels of utilization insight and decision making certainty for finance leadership.**

### About Cleanshelf

Cleanshelf is the leading SaaS spend optimization solution focused exclusively on tracking, controlling, and benchmarking subscription SaaS applications. Cleanshelf's cloud technologies help companies save up to 30% on their SaaS spending by automatically identifying unused, underused, or unmanaged licenses and subscriptions.
