Strengthen Your Identity Strategy With These Benefits

Protect Access to All Apps with Passwordless MFA

Cloud apps host a variety of data across your organization. Secure access and accelerate user adoption by providing passwordless access to them.

Eliminate Deployment Complexity

Leverage OneLogin's pre-built Keyless integration and powerful mappings and rules engine to automate the passwordless MFA deployment process. Spend less time on manual entry and more time on other IT initiatives.

Decrease IT Operations and Support Costs

Free up IT time and resources with automated user provisioning and deprovisioning based on user's directory attributes or security groups originating from your corporate directory.

Extend Passwordless Authentication throughout the Organization

Implement privacy preserving passwordless authentication to OneLogin, workstations, VPN, RDP, VDI and more. Ensuring a secure passwordless experience across all company resources.

Advanced Security and Scalability

Rest easy with redundant data centers in the US and Europe, massive scalable infrastructure, quarterly security reviews by iSEC partners, and 24/7 monitoring. 99.9% Uptime Guarantee.

Over 2,000 enterprise customers globally secure their applications with OneLogin

Integrates with Your Existing Directory Infrastructure

OneLogin acts as a secure, virtual directory in the cloud, allowing you to easily synchronize users across any number of directories, including Active Directory (AD), LDAP, Google Apps directory, OneLogin cloud directory, and HR directories. Import user attributes and pass them on to downstream applications via SAML or API-based provisioning. Combined with Keyless, passwordless authentication can be extended from just OneLogin to all company resources ensuring convenient, secure access for all users.

Add Keyless as a trusted identity provider in your OneLogin single sign on environment

OneLogin enabled apps delegate access to Keyless via OpenID connect

Invite users to download the Keyless Authenticator App, and self enroll on their trusted device
