

Maximize your OneLogin Implementation

- Gain full visibility and control of all your SaaS apps
- Manage and optimize SaaS license usage and costs
- Identify blind spots and uncover Shadow IT
- Track and accelerate OneLogin adoption
- Automate employee off-boarding

Torii helps you manage and optimize your organization's SaaS app usage, security and costs.

Discover anomalies

Find users that are active on G Suite / Azure AD but don't have an account on OneLogin, and vice versa.

Easy OneLogin integration

Instant OneLogin integration provides full visibility of all SaaS applications in seconds.

Improve SaaS security

Get real-time alerts when new SaaS apps are connected. Easily ensure that new SaaS apps support SAML before they're adopted.

Save money

Cut costs by quickly identifying and disconnecting unused applications and underutilized SaaS licenses.

Measure OneLogin adoption success

Track the number of total SaaS apps connected to OneLogin over time.

“Torii has clear benefits and value. For example, it is now much easier for us to maintain an up-to-date view of our SaaS tool portfolio, which helps us better manage costs and risks.”

MAARIKA RAUDMÄE, HEAD OF INTERNAL TOOLS
pipe drive

Manage all your SaaS apps. In one single place.

Torii lets you discover, optimize and control your organization's SaaS usage and costs

Instant Discovery

Discover all the SaaS applications being used in your organization to stay in control and avoid surprises.

Smarter License Optimization

Reduce costs by optimizing license usage. Identify redundant or unused licenses across all your SaaS apps.

1-Click Employees Off-Boarding

Manage user and group permissions across apps to instantly control who should have access, and who shouldn't.

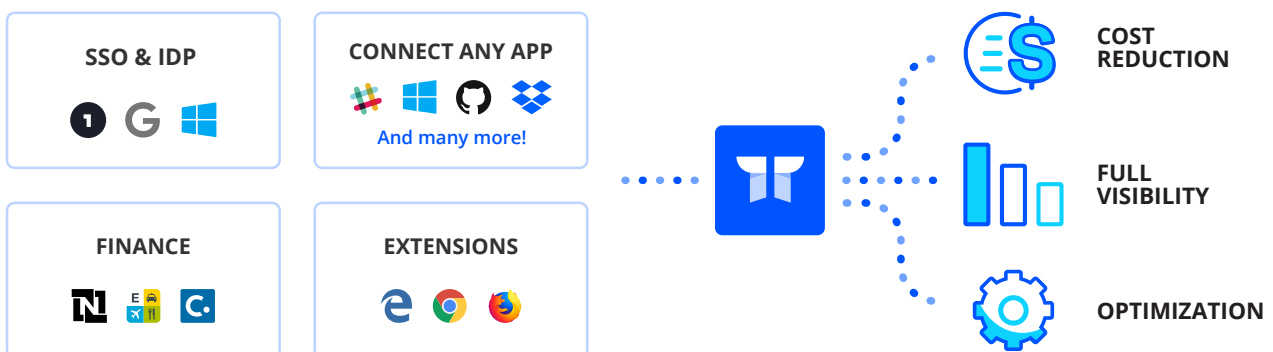

Automated Workflows

Easily automate time-consuming IT tasks to increase efficiency and streamline IT processes.

Torii's unique technology is the only solution that discovers thousands of SaaS and on-premise applications instantly without any configuration.
