## An Evolution to Threat Management

Together, OneLogin and SiON empower companies with a new automated Threat Management platform to stop Internal / Employee and External cyber threats in real-time.

SiON identifies insider threat and automatically disable a suspicious users access to on prem and internal resources. OneLogin will then automatically lock that user's access to cloud based applications like O365, Google, Salesforce, Oracle, AWS, ADP and terminate sessions in over 150+ mission critical applications.

### SiON

A converged platform of UEBA, SOAR & IAM, that integrates and analyzes multiple enterprise data sources and uses machine learning to execute rules and workflows based on permitted or not-permitted end user behavior defined by the organization's information security policy.

- Meets Compliance Requirements
- Deliver relevant information with 5 clicks or less
- Machine Learning and AI Intelligence Capability
- Delivers Proactive Risk Management & Threat Detection
- Simplifies Operations and Cost effective
- 360 Degree view of Devices and Identities in your organization

### OneLogin

Unified Access Management, providing secure Single Sign-On through Role Based Access Control, MFA, Directory Integration and authentication for applications and networking. Securing and controlling Access from Internal + external threats.

Directory  
Integration

Single Sign-On  
(SSO)

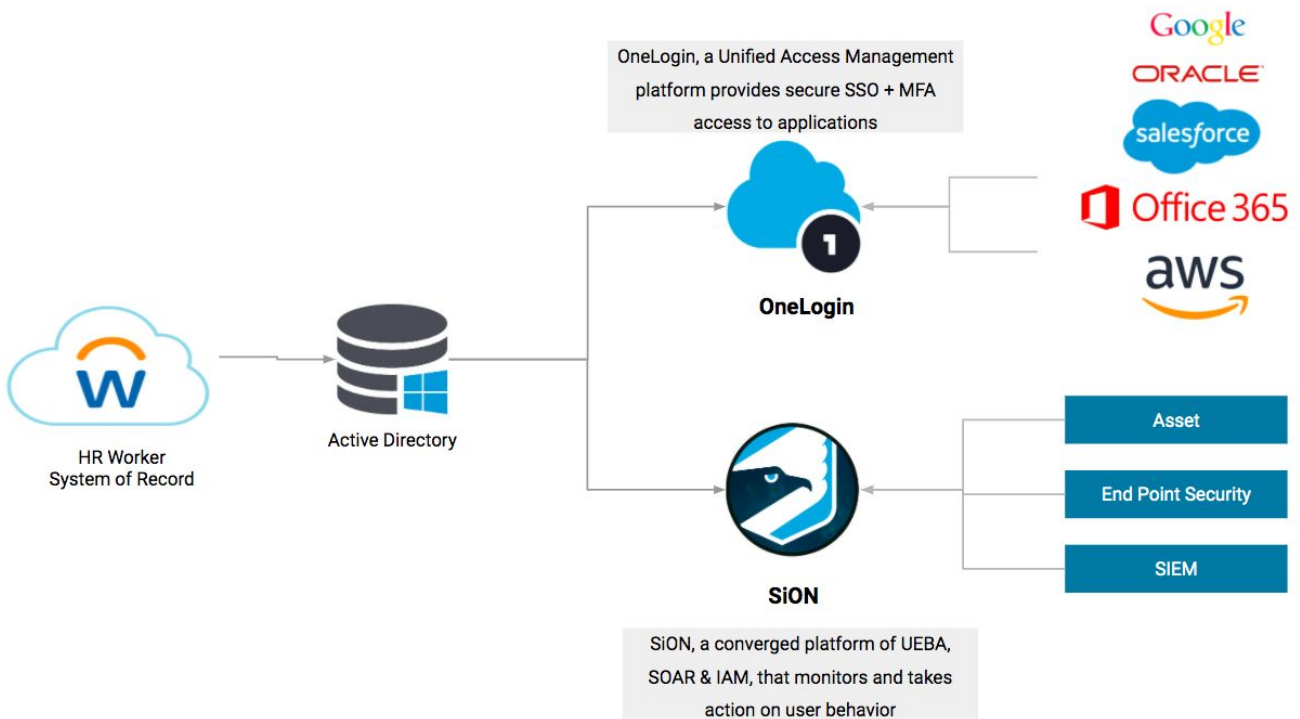

User  
Provisioning

Multi-Factor  
Authentication

## Seamless + Real Time Integration

## Joint Solution Benefits

- Holistic Threat Management solution addressing employee and external cyber threats
  - *SiON identifies internal employee threats and automatically notifies OneLogin in real-time to revoke access and terminate sessions*
- The broad base solution offers tremendous capabilities that strength security + improve productivity.

UEBA

MFA
