Streamlining User Management Workflows Between HR and IT

Implement an HR-driven identity strategy to simplify employee on- and off-boarding workflows jointly managed by HR and IT. Put an end to time-consuming, manual entry of user data between Workday and IT-driven user directories, like Active Directory (AD).

With OneLogin and Workday, you can have one primary system of record for user data across all your applications. If AD, LDAP, or Google Directory must remain your primary system of record, leverage OneLogin's best-in-class directory connectors to delegate authentication and grant, modify, or revoke user access to Workday and other applications based on their directory attributes.

Password Reset

Strengthen Your Identity Strategy With These Benefits

Protect Access to Workday and All Apps

Workday hosts some of your organization's most sensitive data - employee data. Secure access and improve user adoption by allowing employees to use their master credentials to log into Workday and all their corporate SaaS applications.

Decrease IT Operations and Support Costs

Free up IT time and resources with built-in self service password reset and automated user provisioning and deprovisioning. Spend time and money focused other IT initiatives.

Customize Security Controls

Create and enforce customized security policies such as multi-factor authentication, password complexity, session timeout, and more. Easily map those policies based on user attributes or other identifiers such as IP address.

Reduce Complexity of Integration Projects

Leverage OneLogin's pre-built integrations with Workday and all your applications instead of resorting to lengthy integration rollout projects.

Over 2,000 enterprise customers globally secure their applications with OneLogin

Choose Your Preferred Identity Strategy

STRATEGY 1:

HR-Driven Identity Management

Unify HR and IT user provisioning and management workflows by enabling Workday to be your primary system of record and synchronizing user information from Workday across all your corporate systems, including Active Directory.

STRATEGY 2:

IT-Driven Identity Integration

OneLogin's best-in-class directory connectors can integrate Workday with multiple user stores, including Active Directory, LDAP, Google and more in real-time. Integrate in as few as 60 minutes, depending on your environment.
